

INSPECTION

1. VEHICLE NOT INVOLVED IN COLLISION

- (a) Do a diagnostic system check. (See page DI-229)
- (b) Do a visual check which includes the following item with the rear side airbag assembly installed in the vehicle. Check cuts, minute cracks or marked discoloration on the rear side airbag assembly.

2. VEHICLE INVOLVED IN COLLISION AND AIRBAG IS NOT DEPLOYED

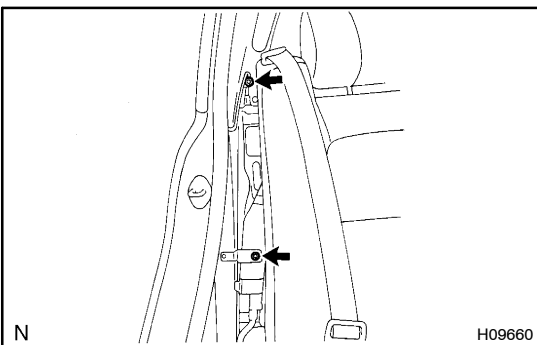

- (a) Do a diagnostic system check. (See page DI-229)
- (b) Do a visual check which includes the following items with the rear side airbag assembly removed from the vehicle.
 - Check cuts and cracks of the rear side airbag assembly.
 - Check cuts and cracks in wire harness, and chipping in connectors.
 - Check the deformation or cracks on the body that the rear side airbag assembly installed to.

HINT:

If the body that the rear side airbag was installed to is deformed or cracked, repair or replace it.

CAUTION:

For removal and installation of the rear side airbag assembly, see page RS-51 and RS-60. Be sure to follow the correct procedure.

3. VEHICLE INVOLVED IN COLLISION AND AIRBAG IS DEPLOYED

- (a) Do a diagnostic system check. (See page DI-229)
- (b) Do a visual check which includes the following items with the seatback assembly removed from the vehicle.
 - Check the deformation or cracks on the body that the rear side airbag assembly installed to.
 - Check the damage to the connector and wire harness.

HINT:

If the body that the rear side airbag was installed to is deformed or cracked, replace it.
