

## PROBLEM SYMPTOMS TABLE

### NOTICE:

When replacing ABS & TRC ECU or sensor etc., turn the ignition switch OFF.

If a normal code is displayed during the DTC check but the problem still occurs, check the circuits for each problem symptom in the order given in the table below and proceed to the relevant troubleshooting page.

Symptom	Suspect Area	See page
ABS does not operate	<p>Only when 1. to 4. are all normal and the problem is still occurring, replace the ABS &amp; TRC ECU.</p> <ol style="list-style-type: none"> <li>1. Check the DTC reconfirming that the normal code is output.</li> <li>2. G power source circuit</li> <li>3. Speed sensor circuit</li> <li>4.
