

## CEILING FEATURES

- 1 An inside rearview mirror made of an electrochromic mirror is provided as standard equipment on all models. During nighttime driving, when the sensor in the inner rearview mirror detects bright lights from the vehicles being driven behind, the amount of light that is reflected by the inner rearview mirror is automatically reduced in order to decrease the glare.
- 2 A digital clock is provided for the rear seat occupants.
- 3 The color of the interior illumination has been made uniform to achieve a luxurious look.
- 4 Lighted vanity mirrors are provided for the front and outside rear seat occupants respectively as standard equipment on all models.
