

SEAT

The seats offer excellent seating comfort and refinement that are worthy of the most luxurious vehicle; they are genuine leather seats that are meticulously made from carefully selected natural materials.

FRONT SEATS

The driver seat provides a multi-adjustable power seat function to realize an optimal seat position. The front passenger seat offers the same functions as the driver seat. (For LHD Model)

REAR SEATS

The rear seats are power seats with a 40/60-split configuration. The rear center armrest contains power seat switches to enable independent control of the right and left seat adjustments.

MO

SALES POINT

- ❖ 1 The 4 front and rear seats are provided with seat heaters as standard equipment on all models.
- ❖ 2 A refreshing mechanism is provided in the 2 rear seats as standard equipment on all models.
- ❖ 3 A DC12V power outlet is provided in the rear center armrest as standard equipment on all models.
- ❖ 4 An Ottoman mechanism has been adopted in the front passenger seat of the RHD model. With this feature, the center section of the seat back flips backward, allowing the occupant in the rear left seat to assume a relaxed seating posture.
