

DESIGN

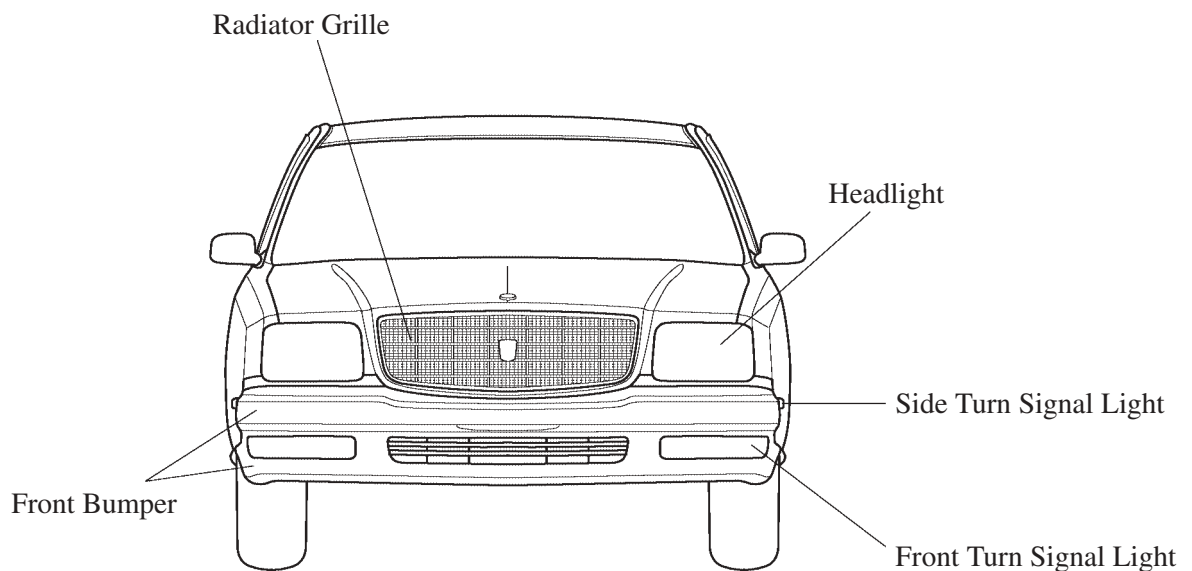

EXTERIOR

(The exterior, consisting of a stately form with longitudinal and horizontal symmetry as well as refined lines and surfaces, projects a style that identifies at a glance the dignity and the presence of the Toyota Century.)

MO

FRONT DESIGN

- ❶ The vehicle's stature is also expressed in its 4-beam headlights with built-in fog lights and clearance lights, front turn signal lights, and side turn signal lights.
- ❷ The front bumper has adopted an upper and lower 2-piece construction. The upper portion of the bumper cover made of resin is the same color as the vehicle's exterior panel and integrates well with the body surface. The lower portion of the bumper bar is made of large composite steel to project the vehicle's luxuriousness and bold presence.
- ❸ A grille with a large, horizontally wide hood has been adopted to emphasize the vehicle's stature.
