

13. Ambient temperature indication remains at ' °C', ' -- °C'.

INSPECTION PROCEDURE

1 Check of multiplex communications.

CHECK:

Are communications between combination meter and body ECU normal?
(Refer to flowchart No. 1)

No

Communication failure.
Faulty wiring harness.

Yes

2 Check of ambient temperature sensor.

CHECK:

Does ambient temperature sensor function normally? (See page DI-786)

No

Faulty ambient temperature sensor.

Yes

Faulty A/C ECU.
Faulty wiring harness.

REFERENCE: Abnormal indication judgment criteria

Indication	Judgment criteria	
Ambient temperature °C	At ignition switch ON	When no data is received
	During communications	When no data is received for 60 sec. or more.
Ambient temperature --°C	At ignition switch ON	When no data is received consecutively for 3 times.
	During communications	When undefined data are received 60 times consecutively.
