

ENHANCEMENT OF PRODUCT APPEAL

■ BUMPER

Both the front and rear bumpers have adopted an upper and lower 2-piece construction. A bumper cover made of TSOP, a bumper bar made of composite steel, and bumper reinforcements made of aluminum have been adopted for weight reduction.

Front Bumper Cross Section

Rear Bumper Cross Section

■ SEAT BELT

- Seat belts with power adjustable shoulder belt anchor positions that can be operated by a switch are provided for the front seats.
- The front seats are provided with an electrical sensing type seat belt pretensioner and seat belt force limiter.
