

INTERIOR

INTERIOR DESIGN

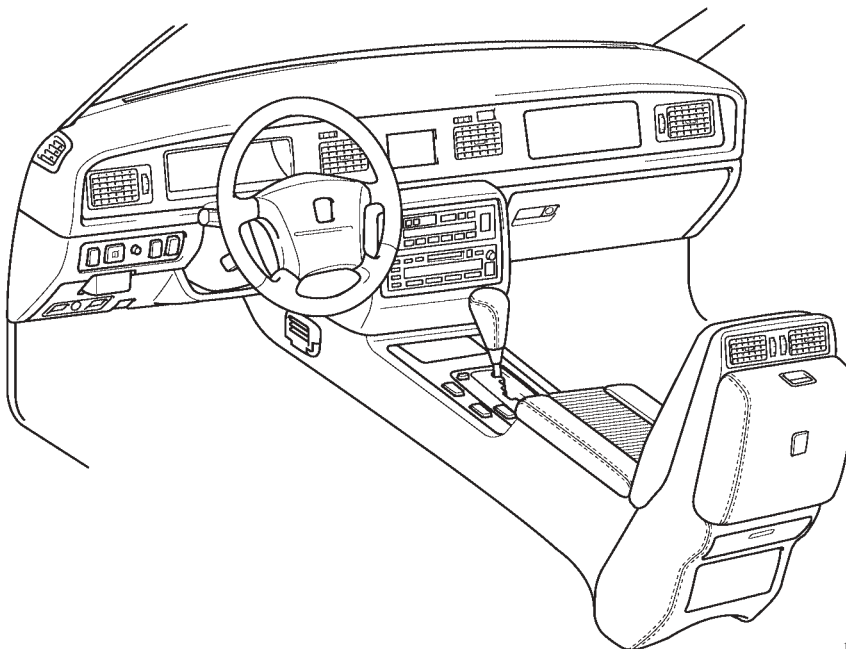

A comfortable and relaxed interior in which one can decidedly feel the four corners has been through a level design that realizes both expansive space and enveloping comfort, and through a symmetric yet simple form.

INSTRUMENT PANEL

- 1 The instrument panel has adopted a horizontal theme that projects a reassuring image even when viewed from the rear seat.
- 2 It has a large composite construction with a minimal amount of parting lines. Thus, its upper portion gives a positive impression of being functional and the lower portion of being part of the interior space.
